INTERESTING LETTER

February 3rd 1959

Dear Mr. Monroe,

Thank you very much for your letter of Jan. 7th. I have just mailed my membership fee for family to the A.H.S. and look forward to receive the "Seed Pod" and nomenclature list.

The Hibiscus grows very well here in St.Croix and especially in the location in which I live. I hardly think we have more than about 50 varieties throughout the whole island; about half of them have been growing here for many years and have either no names or too many names. I believe you have them all in Florida.

Last July I received some graftwood of 53 beautiful varieties from Bass Nursery, Miami, and I am happy to say that I have had very good luck with most of them. This year I hope to graft some more as I am planning a garden that will hold about 300 varieties.

About 18 months ago I made some crosses which are coming into bloom right now, so far I have had nothing real outstanding. I have just planted about 600 seeds of various crosses, so, this very fascinating hobby of mine which is taking a lot of valuable time might develop into a regular business.

I have had a great deal of pleasure going through the book "Hibiscus Unlimited" and the Stations in Florida and Hawaii have very kindly sent me some booklets on hibiscus.

I am very anxious to have a colorchart and would also like to know where I may purchase nursery supplies. This information as well as any other relative to Hibiscus would be very much appreciated.

Sincerely,
M. Kai Lawaetz
